

SOLEO & SOLEO CONNECT

Smart solutions for
stress-free pool care

Essential for ensuring safe, balanced water!

To enjoy your pool with complete peace of mind, several types of water treatment are available, from simple to automatic treatments.

Opt for the **Soleo** solution, the solution tailored to your pool. This solution allows you to get the most out of your pool thanks to **permanent water quality monitoring and automatic treatment**, at the right time and with the right quantity of products. You can choose from disinfection by chlorination or electrolysis treatment.

If you're looking for an automated solution or wish to control your variable speed pump, opt for the Speedeo Connect control unit.

Private pool

SOLEO pH

The Soleo pH intelligent regulator offers several benefits: it adapts the filtration time to the water temperature and maintains the pH at its setpoint to ensure the effectiveness of the chlorine treatment.

With its digital display, you can easily monitor the values (or constants) of your water, the temperature, pH and presence of chlorine (ORP).

SOLEO Rx

For greater autonomy, the Soleo Rx pH/ORP regulation system provides the same services as the Soleo pH but has an additional peristaltic pump for liquid chlorination treatment.

You no longer need to physically add chlorine to your pool's water, it can be automatically injected at the right time and in the desired quantity.

SOLEO Salt

For additional peace of mind, the Soleo Salt solution offers a complete electrolysis solution with pH/ORP regulation.

Salt electrolysis generates pure active chlorine for effective water treatment by applying the right dose at the right time. It is a less aggressive treatment that prevents skin irritation.

Peace of mind

solutions with
Speedeo Connect

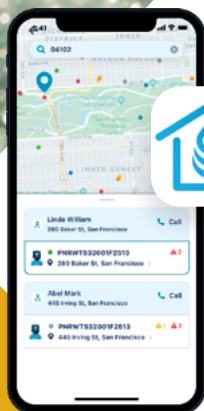

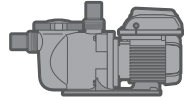

Soleo Connect Salt

The Soleo Connect solutions for all your water treatment control needs

The 3 Soleo Connect solutions have the same characteristics as the Soleo solutions but add extended automation functions such as:

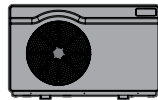

- + the control of the Pentair VS2, VSF or equivalent variable speed pumps,
- + the control of the heat pump,
- + remote management on your smartphone with Pentair Home App.

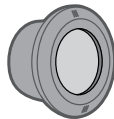

The right speed at the right time

In addition to the water-treatment control systems, you can control your variable speed pump with our Soleo Connect solutions. Optimise the filtration time and make savings.

Put more summer in your calendar

Our Soleo Connect solutions also allow for the centralised programming of your heating.

Intelligent by design

These solutions also allow for the control of your underwater lighting and the position sensor for the pool cover, which is essential when using an electrolyser.

Peace of mind at your fingertips

Thanks to its WiFi connection, you can now access, control or modify these parameters from anywhere. So wherever you are, you are reassured and fully in control of your pool. The Pentair Gateway (sold as an option) offers a direct connection via WiFi or LoRa (long range radio) when the WiFi is not available close to your technical room.

⁽¹⁾Energy-efficient equipment classification: the higher the number of 💧, the more energy efficient and environmentally responsible your equipment is. The main considerations for a virtuous pool include: the right quantity at the right time, the right action at the right time and the 'swimmability'. Find out more at: www.pentairpooleurope.com

The new range of SOLEO products offer an intelligent pool water treatment solution for your complete peace of mind !

Optional accessories

Would you like to upgrade your Soleo pH unit to include liquid chlorination treatment?

ADD A PERISTALTIC PUMP

Reception problem?
We have the solution,
