When running at a low speed, it sounds like nothing more than a whisper.

AND BIG ENERGY SAVINGS

The combination of variable speed and sensorless flow saves you up to 90%.*

*Savings based on variable speed pump compared to a single-speed pump running 12 hours per day at an average of \$0.16 per kWh in a 75,000 liters pool. Actual savings may vary based on local utility rates, pool size, pump run time, pump horsepower, pump rpm, plumbing size and length, pump model, service factor and other hydraulic factors.
