

MAKE YOUR POOL SPARKLE
**with a Pentair
element filter!**

REASON

1

Smart and sustainable filtration. Check!

Clean & Clear element filters deliver a smarter, more sustainable way to keep pool water crystal clear — without the need for backwashing.

Enjoy clear benefits every day

+ Save up to 6,000 liters of water per year

No backwash means significantly less water sent to waste compared to traditional sand filters.

+ Lower energy consumption

No cold water refill avoids unnecessary reheating, helping reduce overall energy use.

+ Reduce chemical usage

A stable water balance is maintained, minimizing corrections and ensuring consistent water quality.

+ Preserve system performance and durability

Stable pressure supports optimal flow, improves filtration efficiency, and helps protect the hydraulic network over time.

REASON

2

Effortless installation. Built to last.

Clean & Clear element filters are designed for **easy integration, minimal maintenance, and long-term reliability** – delivering performance you can count on, year after year.

Designed to simplify everyday use

+ Quick and flexible installation

Compact footprint makes integration easy, even in tight technical rooms – ideal for both new setups and replacements.

+ Hassle-free maintenance

Only one cleaning per season*, with no backwashing required. Simply remove and rinse the cartridges – done in minutes.

+ Clean, sand-free operation

No sand handling, no sand in the pool – for a cleaner and more convenient experience.

+ Long-lasting durability

Robust thermoplastic construction, resistant to UV, heat, cold, and corrosion – built to perform in all conditions.

Pentair offers a 2-year warranty on Clean & Clear element filters with an extended warranty on the shell of 10 years.

* Cleaning frequency depends on filter sizing and the pool environment.

REASON

3

Exceptional clarity. Outstanding filtration performance.

Clean & Clear element filters deliver superior filtration fineness, capturing the smallest impurities to provide crystal-clear, sparkling water every day.

Experience the difference immediately

+ Finer filtration for visibly cleaner water

Surface filtration captures particles down to 20–25 microns (vs. 40–50 microns with sand), ensuring superior clarity – no flocculant needed.

+ Brilliant, sparkling pool water

More impurities removed means consistently clearer, healthier and more inviting water.

+ Premium Pleatco ULTRA cartridges, standard

Equipped with high-quality Pleatco cartridge using triple-action technology for ultimate dirt capture. Pleatco cartridges are made of high-quality materials, designed to provide efficient filtration and extended longevity. Properly maintained cartridges last 4 to 6 years, ensuring reliable performance over time.

Clean & Clear range close up

An element filter consists out of a simple fiberglass-reinforced polypropylene 2-piece tank (lid and bottom) with Pleatco element(s) inside. A pool pump pushes water into the tank through the element membrane. The element will trap the debris and clean water returns back into the pool. There is the choice between a single-element filter or a multi-element filter.

Easy to use high flow air relief valve

Easy to open locking ring. Click and twist. Only for Clean & Clear and Clean & Clear RP

Clean & Clear
single element
for small pools

Innovative side-entry design optimizes flow for greater energy efficiency

Clean & Clear PLUS
single element for
small/medium pools

simplified cast clamp for improved serviceability

Clean & Clear PLUS
4-cartridges filter for
larger pools

With Pleatco ULTRA
element inside

Pool	Model	Filter Area (m ²)	Optimal Flow rate (m ³ /h)	Maximal Flow rate (m ³ /h)	Vertical clearance required (mm)	Turnover capacity (m ³)		
						6H	8H	12H
